#### 14. Safety and Damage Considerations

- Are there plans for disposal at the end of the space objects' life (e.g. re-orbit, de-orbit, retrieval)?

---

---

---

---

---

- Will the space object dock or rendezvous (if yes, please give details)?
- Is it planned that any solid, ionising or gaseous materials should be released from the object other than as part of a normal propulsion system? Note: The propulsion system covers AOCS thrusters.
- (If Yes, please give details)

---

---

---

- Will any laser be operated from the space object?  
(If Yes, please give details)

---

---

---

- Will the space object carry any radioactive or nuclear material?  
(If Yes, please give details)

---

---

---

- Will the space object carry any form of animal life?  
(If Yes, please give details)

---

---

---

- At what radio frequencies and at what powers will the space object transmit during its planned mission? Are there additional frequencies or transmit powers which can be invoked?

---

---

---

15. Please give details of:-

- Name of launching authority;

---

- Designator or registration number;

---

- Basic orbital parameters:

(a) Period

(b) Inclination

(c) Apogee

(d) Perigee

In the case of a satellite planned to operate in geosynchronous orbit please also state:-

- the planned orbital longitude

- the planned latitude and longitude boundaries within which the satellite will operate

- Have the orbital slot and frequency been approved by the ITU?

---

---

---

16. Please give a brief statement on the purpose of the mission which you would be willing to see publicly disclosed, if necessary.

---

---

---

17. Please nominate a contact point to whom we can refer further enquiries:
